

Writing Unit 6 (100 word minimum)

Setting up the car's gps

1. First, you need to start the car. Without that, there would be no electricity.
2. Turn the screen on by pressing the button at the left of the screen.
3. Once the screen is on, touch on <Settings>
4. Then, navigate through the menu until you locate the 'power on / off' section.
5. Power the Bluetooth on, and find the 'pair a new device'.
6. While the car is searching for new devices, you need to try to do the same on your preferred device (mobile, tablet)
7. When one of both finds the other one, click on <Connect>
8. The car will send a message with the password. Make sure you see the same password at your device, and click on 'accept'.
9. Congrats! Your device is now connected to the car.
10. Having the car and the device connected, the screen will automatically show the apps of your phone, which may include 'Google Maps', 'Waze'...
11. Finally, you can choose your most loved app for displaying the map, click on its icon, and search for your destination.
