Creo el objeto tObjVenta:

```
SQL> CREATE OR REPLACE TYPE tObjVenta AS OBJECT(

2 CodVenta NUMBER,

3 CodCl REF tObjCliente,

4 Productos tbLineaVenta,

5 Fecha DATE,

6 MEMBER FUNCTION totalVenta RETURN NUMBER,

7 PRAGMA RESTRICT_REFERENCES(totalVenta,RNPS,WNDS,WNPS)

8 );

9 /

TYPE created.

Commit complete.
```

Creo la función totalVenta con su body:

```
SQL> CREATE TYPE BODY tObjVenta AS
2 MEMBER FUNCTION totalVenta RETURN NUMBER IS
     prod tObjProducto;
3
4
     lv tObjLineaVenta;
5 cont INTEGER;6 total NUMBER:=0;
 7 BEGIN
8 FOR i IN 1..SELF.Productos.COUNT LOOP
9
      lv:=SELF.Productos(i);
        SELECT DEREF(lv.CodProd) INTO prod FROM DUAL; total:= total+lv.cantidad*prod.precio;
10
12 END LOOP;
13 RETURN total:
14 END:
15 END;
16 /
```

TYPE BODY created.

Commit complete.

Hago desc al tObjVenta:
